L. M. LARSON, Proprietor.

Saturday's Meeting of the Stony Plain Liberal Association.

The Liberal Association for the Stony Plain Constituency held its annual meeting on Saturday last, in the Moose Hall, with the president of the Association, Mr Geo. J. Bryan, in the chair. With him on the platform were: Mr W R Howson, Leader of the Opposition in the Legislature; Messrs Dechene, M L A for St Paul; Bolen, the M.L.A. for Calgary; and F R Falconer, the M.L.A. for Athabasca.

The first speaker introduced to the audience by the chairman was Mr Bolen. Altho this gentleman lives in the City of Calgary and represents one of its divisions in the Legislature, he is a farmer with large interests at stake, and spoke as one farmer to another. He dealt with the problems which confront the agriculturist at the present time, and showed the way in which these could be successfully met and overcome.

Mr Dechene was the next speaker, and he gave a very clever and characteristic address, dealing, in a general way, with the matters which have come before the Assembly during the present session. Mr Dechene emphasized the point that there should be no divisions among the peoples of the province—either social, racial or credal. In closing, he asked that they all combine for the common purpose—the betterment of all.

Assemblyman F R Falconer, a gentleman in the hardware business up in the town of Athabasca, gave a very comprehensive survey of the matters engaging public attention at this day.

The principal speaker of the afternoon was Mr W R Howson, leader of the Liberal party in the province. In his opening remarks, Mr Howson declared he did not intend to make a political speech, but rather that his remarks would be more in the nature of a business talk. He followed up this line, and stated facts, backed up by the official documents, in connection with the operations of the Brownlee Government. He gave as an instance the new Normal School in Edmonton, which had cost, a few years ago, between \$600,000 and \$700,000 to build and get ready for occupation. The Government has now declared its intention to close this school, in June. The public debt of the Province was touched on; and it was stated that this had almost rebled since this Government had come into power in 1921. And this was a Government which had been elected on a policy of retrenchment and to eliminate all unnecessary expense in the operation of the various departments of the Government. A number of other subjects were dealt with by Mr Howson in his address, and which seemed to be appreciated by the large crowd of attentive listeners which filled the hall.

At the close of the speech-making, the Chairman intimated that it had been the intention to hold an election for officers of the Association, on this day, but that, in view of the fact that so many from the outside points were unable to be present owing to the blocked roads, that maybe it would be advisable to postpone the election of officers to a time when a larger representation would be present.

A motion, moved by Mrs R E Wood and seconded by Mr B G Powell, carried, that the election for officers be set over to a more suitable occasion.

Inga's Inaugural.

On Monday next, the 13th, the six newly-elected Councillors of Inga Municipality will hold their first meeting. Mr J Renshaw, who has been acting as the official administrator for the past year, will be present, and retire from his position as administrator. There is a possibility of Mr Robt. English, deputy minister of Municipal Affairs, being present.

As Mr H W Dodge, who has been acting as secretary for the same length of time as Mr Renshaw, is expected to return to his former berth in the Hon Mr Reid's department, one duty for the new Councillors to perform will be the appointment of a secretary-treasurer. There is said to be some half-dozen competent accountants who are applying for the job.

According to a clause in the M. D. Act, the appointment of a secretary must have the approval of Hon R G Reid, Minister of Municipal Affairs.

Ladies' Aid Officers.

At the last meeting of the United Ladies' Aid, held at the home of Mrs F W Yeats, the following officers were elected for the year—

Pres.—Mrs J Malloch
V Pres.—Mrs J Lory
Secretary—Mrs J F Clarke
Treas.—Mrs R A Walton
Convenors: fancy work, Mrs W E H Lewis; plain sewing, Mrs F W Yeats; manse committee, Mesdames Clarke and Malloch. Mrs Sieber was elected Honorary President.

'The Bishop's Candlesticks.'

The Dramatic Club of McDougall Church, Edmonton, will put on a 45-minute sketch "The Bishop's Candlesticks," (a humorous number in Moose Hall on tomorrow (Friday) Evg. March 10th, at 8.30 o'clock.

The Ladies Aid of United Church are putting on this entertainment. In addition to the play, there will be music and readings to complete the program.

Welcome Announcements.

The recent statement by Premier Bennett in the House of Commons in which he outlined the attitude of himself and his Government on the subject of reciprocal trade relations with the United States, and in which he declared that the United States was Canada's natural market, constitutes not only an announcement of great interest and importance, but it has the effect of removing, at least so far as the principle involved is concerned, this particular phase of the tariff question from the realm of partisan politics. Differences of opinion as to details of any such trade arrangement may exist or develop between the two great political parties in this country, but so far as the question of the desirability of such an arrangement, it has now been quite plain that there is no difference of opinion.

To all those who feel that the important question of the tariff should, as far as possible, be removed from the arena of partisan political controversy, this unanimity of view will be most gratifying, as well as a most hopeful sign that at no distant date a marked improvement in the trade relations of these two great countries, having so many things in common, and divided only by an imaginary boundary line, will be effected.

Premier Bennett's most important announcement when speaking to a resolution moved by a Liberal member, and which was worded as follows: "That, in the opinion of this House, it is expedient that the Government of Canada re-open negotiations with the Government of the United States of America with a view of bringing about a satisfactory reciprocal trade agreement between Canada and the United States whereby the natural products of Canada, that is the products of the sea, the farm, the mines, and the forests, and including fish, hunting, etc., should have free entry into the United States in exchange for the admission of certain goods from the United States of America, which in the interests of both countries may be admitted into Canada, free from customs tariffs."

Almost equal in its importance to Premier Bennett's statement, is the announcement contained in press despatches that the new Administration at Washington, under the guidance of President Roosevelt, proposes to make overtures to the Canadian Government looking to the negotiation of such a trade agreement or treaty, if, indeed, such overtures have not already been tentatively made.

Canadians generally will welcome these new developments, and nowhere will they be received with greater goodwill, and with sincere hopes that success will attend such negotiations, than in the provinces of Western Canada. Unquestionably, the continent of North America is one economic unit, however it may be divided politically and nationally. Nature made it so geographically and climate made it so.

The United States can supply Canada with many things we do not, and cannot, produce for ourselves—cotton, tropical and semi-tropical fruits, anthracite coal, many articles of manufacture, to mention only a few items. On the other hand, the United States stands in need of enormous quantities of other natural products which Canada can supply in abundance. Why, then, should both countries erect barriers against the natural exchange of such commodities to the disadvantage of both?

Here in Western Canada we can raise tens of thousands of head of range cattle, but we are handicapped in finishing them for market, including the British market, and are at a distinct disadvantage in competing with the Argentine. But the United States raises enormous quantities of corn for feeding purposes. What is more natural than that Western Canada should ship thousands upon thousands of stocker cattle to the corn states to the south to be fattened for market? Both countries would profit thereby.

Why should the Maritime Provinces be forced to look for markets long distances inland in Ontario and Quebec, even in the West, with the rich markets of the great cities along the U.S. Atlantic seaboard right at hand and easily and cheaply reached by water transportation? Why should Ontario, lacking coal supplies of its own, be denied free and cheap access to the great coalfields immediately to the south but in the United States? Why should either country cripple the natural flow of trade north and south, fighting geography in an uneconomical fashion, while striving for markets thousands of miles away?

Is it now admitted, almost universally, that the troubles which today beset the world are almost entirely of our own making, the result of our own blindness and stupidity, and not the fault of an all-wise Providence nor the breakdown of the immutable laws of Nature?

Canada and the United States have set the world an object lesson for more than one hundred years of an undefined boundary line thousands of miles in extent. We have shown the nations of the world how international relations should be conducted so as to avoid all physical warfare. Can we not also show the world, in its present time of distress, how international economic relations should be governed so as to avoid economic warfare?

Assuredly we can, if we will. And it is because we should do so that these announcements of the past few weeks are so welcome, so promising of great betterment for the peoples of both countries. And to us in Canada especially welcome is indicating a unity of desire and policy on the part of all our political parties in the advancement of the common good and economic welfare of this Dominion.

Rich Gold Strike

New South African Field Opens Up Great Possibilities

Another great gold strike—possibly equal to past rushes which helped end former depressions—was described to the American Institute of mining and metallurgical engineers.

One-eighth of the world's present gold production is the estimate, though not yet proven, capacity of this new field, the Consolidated Goldfields, South Africa. This dazzling estimate was reported by F. W. Lee, supervising engineer, geophysical supervising engineer, geophysical section, United States Bureau of Mines, Washington.

It caps several weeks of reports in inside circles of New York engineers that the new South African field might produce enough gold to start the ball rolling toward world prosperity.

Lee told the story of how the new scientific "diving rod," the magnetometer, located the ore.

"The greatest outstanding achievements of the year," said Mr. Lee, "was made by the engineers in the Consolidated goldfields. Here the sub-surface of the main reef series was traced from Middelvlei through properties of the Westward area, a distance of from 30 to 40 miles."

Art Competition

Manitoba and Quebec Student Architects Win Awards

Manitoba and Quebec student architects won awards in the Royal Architectural Institute of Canada competitions, result of which were announced recently.

Leonie Desgagne, Ecole Des Beaux-Arts, Quebec, won first prize in the class "A" project, in which 53 designs were submitted, and Eric Thrift, University of Manitoba, was awarded first prize in class "B" project. Forty-nine designs were submitted for the latter class.

Maurice Gervais, Ecole Des Beaux-Arts, Montreal, won second in class "A" project; G. R. White, University of Toronto, and William Sheets, University of Manitoba, received honorable mention.

In class "B" Lowell Wallace, University of Manitoba, was second, and M. M. Saunders, University of Toronto, third. The University of Alberta had one design entered in the class "A" project and eight in class "B" but won no prize.

The jury of award consisted of: H. L. Featherstonhaugh, Montreal; Irene Gauthier, Montreal; Wilfred Lecroix, Quebec; John M. Lytle, Toronto, and H. J. Burden, Toronto.

Another Use For Radio

Fever Machine Is Newest Treatment For Certain Diseases

A "fever machine," which treats disease by the power of radio waves to raise the temperature of the body was described before the American College of Physicians at Montreal.

It is a new application of radio, treating disease instead of sending messages, and was reported by Dr. Walter M. Simpson of Dayton, Ohio. The machine is used in treating diseases that are sometimes cured and often improved by producing artificial "fevers" in the body. Among these diseases are general paresis, a form of paralysis that attacks many insane persons, some forms of arthritis, disease of the joints, and diseases that affect the bodily extremities—arms and legs, feet and hands.

The fever machine is a short-wave radio transmitter, which "broadcasts" 30-meter radio waves through the patient from large metal plates.

Orient Buying Wheat

Shipments From Canada This Season Total 8,814,011 Bushels

Steadily increasing demand in the Orient for wheat is instanced by the fact that Canada has shipped 8,814,011 bushels to China and Japan so far this season. This is 677,413 bushels greater than consignments at this time last year, and it is believed final figures will exceed last year's mark by more than a million bushels.

Bookings up to the end of March for the Orient are 268,666 bushels. Only the lower grades are wanted, and Australia, near at hand, has been getting the lion's share of the business.

Robe Proved Good Mascot

Gift Of Maori Chief Treasured By British Admiral

Admiral Sir Lionel Halsey, commander and treasurer to the Prince of Wales, told the Authors' Club at London, England, of a New Zealand "kiwi" robe which he wore whenever he fought in action during the Great War.

The garment, a kind of kilt made of flax, was given to him by a Maori chief when he was in command of the battle cruiser "New Zealand." The "New Zealand" went on a cruise to the dominion. One chief, after being shown every trip made, together with the "kiwi" robe and asked him to promise that whenever he took the ship into action he would wear it. He told him that it had been worn by his forebears in war, but that it would never be required in that country again.

On August 28, 1914, when the action of Heligoland was fought, Sir Lionel said he wore the robe in the conning tower, and he added that the "New Zealand" never received a scratch during the fighting.

After this the garment was looked upon as a mascot. On Jan. 24, 1915, the "New Zealand" fought the German ship "Blücher," which was sunk. Again he wore the "kiwi" with the same result, the "New Zealand" receiving no damage whatever.

In May, 1915, he left the "New Zealand" as captain, later Admiral, Sir John Green. He handed over the "kiwi" to his successor and in the Battle of Jutland Captain Green wore it when he took the ship into action. Two ships in his own line were blown up and sunk, but the "New Zealand" received practically no damage whatever. After the war, Sir Lionel added, the garment was returned to him and it was one of his most treasured possessions.

Long Gas Line

Proposed To Build Gas Line From Alberta To The Coast

The findings of the Alberta conservation commission is expected to have a bearing upon the plans of oil syndicates to construct a pipe line through to the coast to supply the cities of Vancouver in British Columbia, and of Spokane, Seattle and Tacoma in the state of Washington, with natural gas, it was stated by William C. Fisher, of Calgary.

"This is not a visionary project," said Mr. Fisher. "The findings of the conservation commission will determine the extent of the gas pressure in the Turner Valley area."

"If it is proved that the field can guarantee a 20-year supply, there should be nothing to hinder the proposed gas pipeline to the coast for the supply of cheap natural gas."

Retina Of Eye Affected By Any Abnormal Condition

Practically every disease common to man, says Dr. Clarence R. Ellis, of the Ohio State University applied optics department, can be diagnosed by an examination of the retina of the eye.

Any abnormal condition, he explained, affects the retina immediately—particularly such diseases as brain tumors, heart trouble, cancer and inflammation of the liver.

The chief cause of eye trouble, he added, is the use of too powerful light bulbs in reading lamps.

Electric Eye Records Activity Of Housewife

Information Obtained By U.S. Bureau Of Home Economics

For each member of her family, the average housewife makes 18 trips a day to the kitchen sink, according to a February issue of the American Journal of Home Economics.

Each time she goes to the sink, the electric eye she spends, on an average, one minute.

Thus, the homemaker in a family of five will average 90 trips daily to the sink and will work there for an hour and a half.

A photo-electric eye was used to help record every trip made, together with the time spent at the sink. The U.S. Bureau of Home Economics was asked to make this study by the chairman of the committee on kitchens of the president's conference on home building and home ownership, and it received outside cooperation.

An analysis of the study shows that the Washington, D.C., housewives in whose kitchens the photo-electric eye was placed, spent from 38 to 162 minutes at the sink each day, while the number of trips varied from 32 to 217. The reasons for such variations, according to the article, can be determined only by more detailed studies. The definite factual data hitherto unavailable in such studies should make possible more definite conclusions as to the comparative arrangement of different types of kitchen, Dr. Stanley says.

World Trade Of Britain Continues To Expand, Despite Existing Conditions

Undertended by adverse world conditions and by the prolonged period of difficulty through which it has passed, industrial Britain goes steadily ahead receiving and filling orders for foreign account, often in the face of severe competition from other nations, and thus continuing to build up Britain's reputation as a centre for the production of superior manufactured articles in widespread demand.

Of decided interest to Canadians is the announcement made by representatives of the Welsh tinplate trade of a record order from the American Can Company, operating works in Montreal and Vancouver, for a million boxes of tinplate valued at \$700,000. The firm receiving this order controls 20 tinplate works in South Wales, in addition to six iron and steel plants, and already the effects of the contract are being reflected in increased activity in local industrial circles.

A Manchester plant has recently completed a contract for eight heavy mixed-traffic locomotives for service on the Chinese Government Railways and the locomotives, fully erected, have been shipped in a vessel specially equipped for such consignments. Locomotives of this description have been supplied to China by United States firms in the past.

Four oil-electric locomotives, the largest yet produced in Europe, are about to be shipped from the Armstrong, Whitworth works near Newcastle-on-Tyne to South America for use on the Buenos Aires Great Southern Railway.

Two engineering firms are reported to have jointly secured a contract for gasoline storage tanks which are to be erected at Haifa, Palestine, for the Iraq Petroleum Company. The contract, Industrial Britain reports, is worth £100,000 and was secured in the face of world-wide competition.

From Durham county comes word of the receipt of orders from Czechoslovakia and Holland for coal-cleaning equipment representing a total value of more than \$40,000.

Orders from Persia for textile machinery to the value of \$40,000 have been received by Lancashire firms. These orders follow the announcement that the Shah of Persia has given instructions that the machinery for a number of spinning and weaving mills that are being established in that country must be ordered from Great Britain.

Another big contract has been placed by the Russian trade agency with a Manchester firm for a railway axle plant which is to be installed by the Soviet Government with an annual output of 70,000 axles. The same firm has recently completed a large Russian machine tools order, and the latest one was obtained in the face of severe competition from Germany.

A Bolton concern of machine-tool makers reports the successful conclusion of negotiations with Canadian buyers for various types of tools formerly purchased from the United States. The order, it is stated, runs into thousands of pounds in value.

Thus, in hard times as well as in good times, the British industrialists go steadily forward capturing orders for the provision of machinery or other articles to foreign countries, notwithstanding severe competition from other nations. His business surmounts tariff and other barriers and the world continues to be his market. That he is enabled to receive his due share of foreign orders is principally due to the quality of his output, for it is universally recognized that British goods are satisfactory goods and in spite of great temptations, the British industrialist has consistently declined to put an inferior article on the market.

Those who are accustomed to argue that Britain is dead industrially and otherwise fail to take into account the energy with which the British manufacturer continues to seek an outlet for his goods and the market which those goods continue to command, on account of their inherent quality, in spite of world conditions in world trade.

Need Paid Hunters

To Protect Game In Northern Manitoba From Timber Wolves

With timber wolves increasing in numbers and few pelts being brought into The Pas for bounties, northern Manitobans say that the only way to save the game in the Moose Lake country, will be by means of at least two paid hunters. It is learned at The Pas, Manitoba, that only 54 timber wolf pelts were brought there for bounty last year. This does not represent the total number killed, of course, as some pelts go right through to the cities. But the number of wolves killed was small in proportion to the wolf population.

Tom Lamb, Moose Lake trader, has found a number of deer cut down by wolves and left to rot. On a recent trip, he found a beautiful animal that had been killed by wolves. It had been chewed slightly at the throat. Lamb marked the spot intending to bring the deer to The Pas, where he intended to place it on exhibition. On returning a couple of days later, he found the passing Indians had taken part of it for dog feed.

A TAILORED JUMPER OF SPRING-GREEN FUR WITH A SHEER FRESH YELLOW DIMITY BLOUSE

Doesn't it all sound charming? The capelet collar is finished with a tiny frill with green picot edge. The tiny ruffling appears again on the cuffs. Pin tucks are decorative at the front of the blouse.

This cute rig can also be made with short sleeves as in small back view. For frankly hot weather wear, the sleeves can be omitted from the guimpe. You will note the cape collar just turns the shoulder, which gives a very pretty effect.

State points, linen, seersucker and dimity are nice mediums. Besides cottons, wool crepe and wool jersey can be used for the jumper with a tubular guimpe.

Style No. 457 is designed for sizes 4, 6 and 8 years.

Size 4 requires 1 1/2 yards 35-inch, with 1 yard 35-inch for blouse. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap clips carefully.

Rapid Growth Of Insanity

Psychology Professor Claims Canada and U.S. Lead World

Canada and the United States in equal per capita, are leading the world in numbers of insane, according to Very Rev. Canon Charles Verheijen, professor of psychology and psychiatry at the State University of Amsterdam, Holland, who sailed from Saint John after completing an independent study of psychiatry cases in North America, during which he was attached to the Church of Our Lady of Victory in Saskatoon for two months.

"The rapid growth of insanity is due to a large extent from the depression with its resultant financial worries and the like," said the eminent alienist. "The fast life of this country and the United States is also one of the main causes. Young girls are not heeding the demands of health. They stay up late at night. Get little sleep and rush off to the office heedless of breakfast. It just can't be done."

Bring Low Prices

Portraits Of Earl Of Egmont's Family Are Auctioned In London, England

Nearly 50 of the Alberta rancher Earl of Egmont's family portraits were sold recently at Christie's famous auction parlors in London, England.

Two years ago when some of the old masters belonging to the estate were sold, a Reynolds' portrait alone fetched 5,000 guineas (about \$15,000 at par). Today 50 portraits realized a total of little more than a tenth of that sum.

Works of such half-forgotten painters as Lely, Kneller, Hudson, Hobday and Joseph were put up in one lot, bringing about a pound each. Four portraits by Slater, including one of Spencer Percival, the murdered premier, brought only 12 guineas. Others followed at an average price of 12 guineas a dozen.

Street Purposes Have Changed

New Planning Necessary Opinion Of President Of British Architects

London hears a novel analysis of modern street traffic problems by Sir Raymond Unwin. The president of the Royal Institute of British Architects says street purposes have entirely changed. We run what are practically locomotives at locomotive speed on highways meant for horses and pedestrians. A complete new planning must come. It will expedite traffic through streets on which are no shops, and will assure safety of adults and children on foot. The pedestrians will move leisurely in parallel streets which will have shops but no motor traffic—Christian Science Monitor.

A Wesley Letter

Great Preacher Gave Counsel On The Subject Of Marriage

A letter from John Wesley to a correspondent who had, apparently asked the great preacher for counsel on the subject of marriage was sold at Sotheby's in London, England, for \$125.

The letter is addressed to "Mr. Peter Garforth, at Skipton-in-Craven, Yorkshire," and its contents are as follows:

"My dear brother: A person with all the qualifications you mention, is not every day to be met with. I do not recollect such a one at present. If I meet with or think of one I will send you word. I advise you not by any means to entangle yourself with a predestinarian. A sensible, well-tempered woman, fearing God though not much awakened, is far preferable. Wishing you may have light from God in that and all things, I am, your affectionate brother, J. Wesley."

Rice Growers Face Ruin

Empire Agreements Have Destroyed Trade For British Gulans

About 150,000 of the inhabitants of British Guiana are faced with ruin as a result of the Empire trade agreements reached at Ottawa, according to advices received at Port of Spain, Trinidad, giving the views of the Demerara Rice Marketing Board. Guiana formerly had a preference for its rice in the British market, but under the Ottawa agreements India gets the same rates and has been driving out Guiana rice. An appeal has been made to London for protection of the former market, but the authorities have been informed that no discrimination can be made. About half the population of Guiana is dependent on rice growing.

Australia Using Own Currency

A train of ten cars loaded with English silver coins from all parts of South Africa will be sent to the mint in Pretoria within a few weeks. The shipment will be the result of the decision of the Union of South Africa to use its own currency. The total to be withdrawn is estimated to be the equivalent of \$6,250,000, but the intrinsic value of the silver is less than \$2,000,000. The total number of coins to be withdrawn is between 15,000,000 and 20,000,000.

A bore is one who has nothing to say and keeps on saying it.

The sky schedule for 1932 will be of great interest to star gazers, according to the American Nature Association.

Six periodic comets are due for return engagements. Two eclipses of the sun are on the schedule also.

Then too, Mars, which is probably of more popular interest than any other planet because of its possibilities as an abode of life and its fascinating and varied surface markings which indicate seasonal changes, came to perihelion on March 1.

Perihelion is that point of the orbit of a planet or comet which is nearest to the sun. This is one of the less favorable oppositions, since the planet is 62,700,000 miles distant from the earth at nearest approach on that date.

Nevertheless astronomers interested in the physical phenomena of the planets are keeping this little neighboring world under scrutiny for some weeks, and we may expect to hear more than usual about the ruddy planet Mars within the next few months.

The comets returning are Brorger, Pons-Winnecke, De Vico-Swift, Giacobini, Finlay and Holmes. The first was last seen in 1879 and is due to come to perihelion again in November.

The Pons-Winnecke comet has a period of nearly six years and was discovered in 1819. It is due to return again in May.

Giacobini's comet was discovered by that astronomer at Nice in 1890. It is due at perihelion in June. Finlay's comet is also due in June. Holmes' comet was discovered in 1892. It is due in August.

There will be two eclipses of the sun, both annular. An annular eclipse is one in which the relative positions of sun and moon are such that the moon falls completely to cover the solar disk and there is a thin annulus or ring of light surrounding the dark lunar disk at the time that would correspond to mid-totality of a solar eclipse.

The first eclipse occurred on Feb. 24. The partial phase was visible in the southern and central part of South America, all of Africa, except the extreme northwestern part, the western part of the Mediterranean, Greece, Asia Minor, Persia and Arabia.

The next eclipse will occur on Aug. 21. The partial phase will be visible in central and eastern Europe and northeastern Africa at sunrise, later in the morning, or near mid-day, in Siberia, central and southern Asia, and in the afternoon in the Philippines and East Indies.

Status Of The Metis

Government Spokesman Says Half-Breeds Not Wards Of Dominion

Half-breeds are not wards of the Dominion Government, said Hon. T. G. Murphy, head of the Department of Indian Affairs. Half-breeds were citizens of the provinces in which they lived, he said, with the same rights and responsibilities as the whites. Their care was a provincial matter.

In the Alberta House it was stated that half-breeds in that province were impoverished. Premier J. E. Brownlee said it had not been decided whether the Dominion or provincial administration was responsible for the care of the half-breeds. It might be necessary for the courts to decide.

The pure-bred Indians are wards of the Dominion Government. They have not the rights of the white citizens. The Dominion Government is responsible that they do not suffer want.

Auto Exports Increase

Increased sale of Canadian automobiles abroad is the brightest spot noted in the February business summary issued by the Bank of Montreal. Greater sales were attained abroad throughout the whole of 1932, and January's figure reached a new record for the foreign market is continuing.

A Featherweight Airplane

Slow-Moving Machine Is Remarkably Easy To Handle

Britain sees remarkable results achieved with a slow-moving, featherweight airplane. This new type, which may indicate the coming of "flying for all," is designed by C. H. Lowe-Wyldie. A woman beginner recently made a flight after half an hour's instruction, the instructor giving his orders from the ground. After three hours in the air the pupil was able to pass the tests for her "A" certificate. The plane carries only a 6 horsepower motorcycle engine. Its top speed is 50 miles. But the big factor is that it lands at the "standstill" speed of 18 miles an hour.

Tired Of Depression Talk

Woman Mining Recorder Returns North Where People Do Not Grumble

Tired of talk of depression which she has continually encountered in the cities, Mrs. F. Muncester, British Columbia's only woman mining recorder, started the return to Squaw Creek, near the boundary of the Yukon and Alaska. "At Squaw Creek," she says, "things were never exactly prosperous, but folks take things as they are and never grumble. Why, they don't even know there's a depression. Things go on just the same."

Mrs. Muncester took in a team of sleigh dogs and supplies and she plans to make the trail to Squaw Creek before the ice thaws. Her goal is reached by way of Haines on the United States side and Pleasant Valley, a former Mounted Police outpost.

"As a matter of fact, conditions are better at Squaw Creek now than ever before," says Mrs. Muncester. "Most of the people are trappers, with about one white man to five Indians. There's not much money in fur these days, but gold was discovered up there not long ago and the miners are making from \$8 to \$15 a day in some places, with absolutely no place to spend their money."

Recipes For This Week

(By Betty Barclay)

LUNCH BASKET PINWHEELS

- 1 cup flour.
- 2 teaspoons baking powder.
- 2 tablespoons butter.
- 1/2 teaspoon salt.
- 1/2 cup milk.
- 2 tablespoons sugar.
- 1/2 teaspoon orange juice.
- Grated orange rind.

Mix and sift flour, baking powder and salt, rub in one tablespoon butter, or other shortening, and moisten to a dough with milk. Roll thin; spread with remaining butter, sprinkle with sugar, mixed with orange juice and rind, and roll up like a jelly-roll. Cut in slices and place, cut side up, in buttered muffin-pans. Sprinkle with remaining sugar, and bake in a hot oven.

HAM MOULDS

- 1 cup cooked ham, chopped fine.
- 2 tablespoons butter.
- 1/4 cup stale bread crumbs.
- 1/2 cup milk.
- 1 egg.
- 1 teaspoon sugar.
- Salt and pepper.

Melt butter. Add bread crumbs and milk. Cook five minutes, stirring constantly. Add ham, egg slightly beaten, and seasonings. Pour into buttered custard cups. Set cups in pan of hot water. Bake in a moderate oven until firm. Serve with a white sauce.

Fish Cargo By Air

Former Two-Day Trip Now Takes Half An Hour

Within half an hour after white fish are caught in the lakes of northern Manitoba they are delivered to a point by aeroplane on the Hudson Bay Railway, 35 miles away, for transit from this point by rail to cities in Canada and the United States where they are in demand. Formerly the 35-mile journey by horse outfits and tractors took two days over rough trails.

The inland fisheries of Canada are among the country's most valuable assets. The fish caught in large quantities for the commercial market in Manitoba come from Lake Winnipeg, Lake Winnipegosis, Lake Manitoba and the smaller lakes. White fish and pickerel are the chief fish caught, but pike, tullibee, gold-eye and several other varieties are plentiful.

JESUS MINISTERING TO THE MULTITUDE

Golden Text: "The Son of Man came not to be ministered unto, but to minister, and to give His life a ransom for many."—Matthew 20:28.
Lesson: Mark 6:1-6.
Devotional Reading: Isaiah 35:1, 2, 6-10.

Explanations and Comments

A Prophet Not Without Honor Save in His Own Country, verses 1-6.
"You remember how, in his Holy War, John Bunyan stations one old Mr. Frejudice, with fifty deaf men under him, at Ear-Gate, to defend that particular gate into the citadel of Mansoul against the assaults of Prince Emmanuel. Well, it was Mr. Frejudice who stopped the ears and hardened the hearts of these Nazarenes against the appeals of Jesus that day."—J. D. Jones.

The Baptist Rehearsed, verses 17-29.
"The death of John the Baptist was a turning point in the life of Jesus. The enemies of Jesus now felt assured that they could compass his death without opposition, since no particular gate into the citadel of Mansoul was left open."

The Return Of The Twelve, verses 30-32.—We might consider the preceding topic, verses 14-29, as an interruption of the narrative, for verse 30 continues the story left at verse 13. The word "apostles" means literally "one who is sent forth, a messenger." The Twelve had been sent forth on their mission, and now on their return Mark calls them apostles, for the first and only time. From the various towns and villages to which they had been sent, two by two, they returned eager to report to their Master what they had done and taught, and what successes and what failures had been theirs in their apprenticeship, as it might be called.

"He sent men out to preach the living Word. Admire with all the ardor of His fire: They spoke the truth, wherever truth was heard; But back to Him they brought their heart's desire;

They turned to Him through all the lengthening days
With each perplexity of life or creed, His deep reward, not that they spoke His praise.
But that they brought to Him their human need."

—Hildegard Hoyt Swift.

Jesus noted the disciples' need of rest as well as of opportunity for uninterrupted talk with him—for there were many coming and going and they had no leisure so much as to eat—and He counselled their going out to quiet uplands on the other side of the lake. This they did.

Artists Very Seldom Have Beautiful Hands

Photos Show Them Strong and Capable But Not Decorative

The idea that hands exhibit more character than faces, and that artistic hands are invariably soft, slender and graceful, is nothing but a snare and a delusion, Mrs. Alma Reid says. Mrs. Reid opened an exhibition in New York of more than 150 photographs of hands of famous men and women, actresses, prizefighters, writers, painters, politicians and housewives.

"The hands of famous actresses," she said, "are almost universally beautiful. Long, slender fingers, meticulously cared for nails and smooth contours are characteristic. Their hands are decorative, as they should be. But when it comes to musicians, writers, sculptors, male or female, the rule does not hold. Their hands are apt to be strong—capable, yes, but not necessarily beautiful."

Pulp and Paper Industry

Operated On Sound Economic Lines

It Would Regain Former Place
When prosperity returns, it should be the task of both Government authorities and those who direct the destinies of the pulp and paper industry to work for an effective control of development, in order that the evil of overproduction may be avoided. The industry allowed to expand in response to normal demands not to artificial stimulus. If it is thoroughly rehabilitated and operated on sound economic lines, there is no reason why it should not regain its former place, but the danger from the American schemers is written plain.—Montreal Star.

Offers Great Possibilities

Small Amount Of Fuel

Fishing over the rails at 65 miles an hour, the first Diesel electric train ever used on an English main line had a successful trial on the 113-mile run from London to Birmingham.

Five minutes ahead, puffing clouds of smoke and steam, sped the regular London-Birmingham flyer, but the Diesel train travelled just as fast and purred along smoothly and almost noiselessly. It required only 25 gallons of fuel, costing a total of seven shillings (about \$1.20 at current exchange) for the journey.

The trip opened startling possibilities for the hard-pressed British railway companies, which have been keeping to steam for a century because of the cheapness of British coal. Recently the Southern Railway tried a new departure, electrifying the main line from London to Brighton, but at a heavy initial cost and after three years' work.

Not only is the coal industry worried by the success of the Diesel train but the advocates of electrification are beginning to wonder whether the Diesel storage battery system is not cheaper and better fitted to British conditions.

World's Brains Still Busy

Someone Is Always Thinking Of New Things For Invention

In 1843, a current magazine article reveals, an official of the United States patent office resigned because "Everything possible had been invented."

Since this gentleman left his post in the smug belief that the world was a finished product, the world's brains have invented the sewing machine, the typewriter, the electric locomotive, the air brake, wireless telegraphy, internal combustion engines, airplanes, cash registers, incandescent lamps, motion pictures and about a million and a half other devices which we now consider commonplace.

RAILWAYS WILL MAKE USE OF AUTO TRUCKS

Montreal, Que.—An important development in freight services on the Canadian National and Canadian Pacific Railways which will provide door-to-door pickup and delivery of freight shipments without extra cost to either shipper or consignee, was announced jointly by George Stephen, vice-president in charge of traffic of the Canadian Pacific Railway, and Alistair Fraser, K.C., acting vice-president in charge of traffic of the Canadian National Railways.

The two railways, the announcement stated, have completed contracts with approximately 45 trucking firms at cities and towns served by their lines in western Ontario, between Toronto and Windsor and Toronto and Sarnia, whereby pickup and delivery service will be provided for shippers at no extra cost. New tariffs embracing this feature will become effective this week.

The railways, it was emphasized, are not entering the trucking business. At some of the points affected by the new tariffs, they already have contracts with cartage firms for pickup and delivery of freight.

Under the present plan, however, this service is extended, by arrangement with local trucking contractors, to points where pickup and delivery service did not previously exist.

The new door-to-door consignment system will improve the service offered at such points and will make use, under contract, of existing cartage services instead of involving the organization of new facilities for that purpose.

New Motor Law

Bill Introduced In Saskatchewan Legislature For Protection Of Public

Regina, Sask.—Motorists responsible for an accident will have their licenses taken away until they pay any judgments rendered between \$100 and \$1,000 for property loss, \$5,000 for the death of one person or \$10,000 for two or more deaths, according to a bill brought into the legislature by Hon. A. C. Stewart, minister of highways.

The proposed act also provides proof of financial responsibility before an auto license is issued to any person under 21 or over 65 years of age, or anyone held responsible for a motor accident.

Saskatchewan's proposed law on financial responsibility of motor owners and drivers is modelled after Ontario's law.

The proposed act does not deny the plaintiff in any motor accident case from proceeding for remedy under any other section of the law.

Price Remains the Same

Radio License Will Be Two Dollars For Another Year

Ottawa, Ont.—Radio licenses will remain at the \$2 figure for another year, Hon. Alfred Durneau announced in the House of Commons. At the same time he expressed the hope the Canadian radio commission would limit programs to advertising produced in Canada goods or to Canadian non-advertising programs.

The House "went on the air" discussing radio estimates of the Department of Marine and taking in a wide range of topics. No decision had been made, the minister said, on the system of collecting receiving licenses this year although the object was to force every owner to pay his fee.

Mr. Durneau said the department this year would be paid for 100,000 more radio licenses at \$2 less the 40 cents commission, under the house to house canvass system.

Studying Income Tax Law

Government Seeks Workable System To Cover Bearer Bonds

Ottawa, Ont.—The quest for a workable system of enforcing the income tax upon income derived from bearer bonds continues.

The proposal to apply a flat rate of four per cent. on all interest coupons presented to the banks for payment has lost ground heavily in the past few days. It is claimed that to adopt such a policy would be to invite wealthy citizens with liquid assets to invest these assets in bearer bonds and reduce their income tax rate to four per cent.

Another proposition has now been put forward which, it is understood, is meeting with a more favorable reception by the cabinet. This plan is to compel all persons cashing interest coupons to make out a certificate of ownership. The certificate would be given to them by the banks, when the coupons were presented for payment.

In addition to declaring ownership, the bond holders would have to sign an affidavit declaring the income concerned had been shown on their tax statement. The certificates and affidavit, of course, would be forwarded to Ottawa and checked against the tax statements.

Bill Goes To Senate

Federal House Passes Measure Extending Ten Per Cent Salary Cut

Ottawa, Ont.—The bill to extend the civil service salary reduction for another year passed all stages of the House of Commons today and was sent to the senate. The measure continues the 10 per cent. reduction in the salaries of civil servants and members of parliament until the end of the fiscal year 1933-34.

About 60,000 people would be affected by the 10 per cent. salary reduction, Hon. E. N. Rhodes, minister of finance, said. In addition to 13,000 casual employees and postmasters of small centres operating on a commission basis, the following public servants would be affected:

Salaries below \$1,200—16,408.
Salaries between \$1,200-\$2,000—22,745.
Salaries between \$2,001-\$3,000—6,123.
Salaries between \$3,001-\$4,000—1,579.
Salaries between \$4,001-\$5,000—461.
Salaries over \$5,000—215.

Gun Running Plot

Seizure Of Machine Guns In Vancouver Leads Police To Investigate

Vancouver, B.C.—Seizure by police of six machine guns, disassembled and expertly packed in the back of a parked automobile and more than 100,000 rounds of ammunition, has led officers to investigate the possible existence of an international gun-running plot centering in Vancouver. Authorities are attempting to trace the origin of the guns, convinced they were designed for shipment to China to be used in operation there against the Japanese. No local trouble, police point out, could possibly call for the use of such a formidable array of guns and large amount of ammunition.

Fine For Honeymooners

Mussolini Cuts Railway Fares For Newly Weds

Rome, Italy.—Honeymooners have been streaming into Rome at the rate of 2,000 couples a month since Mussolini granted them reduced railroad rates.

The order cutting 70 per cent. off newlyweds' fares from anywhere in Italy has been in force seven months. In that time 14,000 couples have visited the capital.

Pope Pius has received practically all of the visitors. He gives each bride a rosary and each bridegroom a religious medal.

Edmonton, Alberta.—A government bill to amend the Alberta Game Act, if accepted by the Alberta Legislature, will permit farmers to shoot game birds anywhere in the province without a license. At present the farmer can only shoot game birds on his own property without a license.

Indian Goes Modern

Now Taking His Place In Affairs Beside the White Man

Ottawa, Ont.—The Indian has gone modern, entering professions, graduating from universities and taking his place beside the white man in business and high finance. Hon. T. G. Murphy, Minister of the Interior, told the House of Commons today. But the Indian retains all his williness and individuality, he refused to become a nationalized Canadian, subject to legal action and taxes. The Indian, as the ward of the Dominion pays no taxes, has no vote, cannot be sued in a civil court and "is cute enough to want to stay that way."

That was the reason, said Mr. Murphy, why the government sought power to compel Indians to be franchised—so they would assume the responsibilities as well as the privileges of citizenship.

For the entire sitting the House discussed the Indian and his problems. Liberals objecting to the compulsory enfranchisement provisions of the government legislation.

Premier R. B. Bennett finally poured oil on the troubled waters by saying a change would be made in the system of enfranchisement—a board consisting of a representative of the Indian tribe, a representative of the Indian Department at Ottawa and a county court judge, would be established to review each application.

No Recent Loans Made

Winnipeg, Man.—Loans have been made by the Dominion government to the provinces, including Manitoba, but none have been made since April, 1932, for direct unemployment relief, stated Premier John Bracken in the legislature. Neither had loans been made in respect of the municipalities' share of the expenditure.

Millionaire Released

Chas. Boettcher, Kidnapped February 12, Is Freed By Abductors

Denver, Col.—Chief of Police Albert T. Clark announced that Charles Boettcher 2nd, heir to millions, who was kidnapped February 12, had been released by his abductors and that no ransom had been paid.

Chief Clark said the 31-year-old broker was released from a motor car and immediately communicated with the home of his father, Claude K. Boettcher. He was taken to the elder Boettcher's home and the chief of police rushed there to question him.

Clark said young Boettcher was in good condition when released. Details of the release were not immediately available, but Clark said Boettcher had been released from the car on the outskirts of the city. Clark said he did not have full details of the release, but reiterated that no ransom had been paid.

Boettcher, prominent young Denver broker and member of one of the city's wealthiest families, was abducted by two men from the garage at his home Sunday night, February 12, and held for \$50,000 ransom.

Protest Arms Embargo

Should Be Limited To Aggressor Opinion Of China

Nanking, China.—It was officially announced that China was making representations in London in connection with the British arms embargo against China and Japan.

Spokesman for the Chinese National Government foreign office said any Far East arms embargo should be limited to the aggressor waging war on China. "It is a colossal blunder and it will have absolutely no effect on the present hostilities."

Tokyo, Japan.—Great Britain's announcement of an arms embargo against Japan and China was interpreted by Japanese authorities as meaning a handicap for China only. In official and business circles there was readiness to see the embargo turn out to be only the first instance of pressure against Japan, with the possibility of eventual economic sanctions.

Royal Assent Given Bill

Authority Granted Manitoba To Borrow For Financing Relief

Winnipeg, Man.—Authority for Manitoba to borrow money for the financing of unemployment relief and to lend money to municipalities for their share of relief costs, was granted the province when Premier John Bracken's bill was given royal assent.

Although the act as it was amended by Mr. Bracken provides for the province borrowing money without specifying the source of the loan, Premier Bracken served notice on the House that later in the session the members will be asked to unanimously request the Dominion to make loans to the province.

GERMANY TO TAKE MEANS TO SUPPRESS REDS

Berlin, Germany.—Hermann Goering, minister without portfolio in the Hitler government; declared in a speech that the incendiary fire at the Reichstag building was meant to inaugurate a series of violent acts culminating in a Communist revolution.

For this reason, he asserted, the government was justified in promulgating its drastic decrees of the last few days, which have already increased penalties for treason and have placed Germany under virtual martial law.

Captain Goering declared the lives of Communists and Socialists were not endangered so long as they kept strictly within the law.

Chancellor Hitler, addressing a delegation of Nazi workers, promised to annihilate the lot of the German workman so that Communist arguments no longer would draw him.

The nation-wide process of squelching Communism continued unabated, with hundreds of leading Communists undergoing arrests while many others fled into hiding.

Extensive precautions were resorted to for the protection of railways, bridges and power stations. Numerous armed guards were posted.

Squads of armed storm troops in the brown Nazi uniforms can be seen at any time marching through Berlin streets on auxiliary police duty. About 3,000 are in service here. Throughout Prussia there are about 60,000 of them.

Banning Allegiance Oath

De Valera In Position To Force Removal From Constitution

Dublin, Irish Free State.—In sixty days the oath of allegiance to the British crown will vanish from the constitution of the Irish Free State and become a dead letter in the Anglo-Irish treaty.

The Dail Eireann passed by a vote of 75 to 40 a government bill abolishing the oath of allegiance to the British crown. The measure now goes to the senate.

The constitution provides that bills which the senate refuses to pass in such a manner as to satisfy the lower House will, at the expiration of 18 months, become law despite the senate.

In the event the dail is dissolved in the meantime, the waiting period is shortened to 60 days.

After the 1932 elections, when Mr. de Valera found himself heading the government for the first time he immediately attempted to remove the oath. He was blocked by the senate. He is now in a position to force removal of the oath, but is still faced with a possibility that this move will fail to satisfy left wing extremists, including the old Sinn Fein.

May Close High Schools

Calgary, Alberta.—Closing of Calgary high schools may occur unless the city can find a way out of its present financial predicament, it is understood. Struck severely by declining revenue following the depression's appearance, the city is forced to every economy. Primary schools would not be shut down.

Royalty Sees First Talkie

London, Eng.—The king and queen have seen their first talking movie and apparently enjoyed it. It was the premiere of the screen version of J. B. Priestley's "The Good Companions" shown as a benefit for the unemployment relief fund. The performance was declared a great success, the proceeds totalling about \$40,000.

Dividends Run Into Millions

Toronto, Ont.—Despite adverse business conditions dividends to be paid in March by Canadian companies may exceed \$16,000,000 when all declarations are made. At present some 43 companies have declared dividends and there are a few more which usually make payments in March.

The Income Tax.

The income tax imposed by the provincial authorities last year brought in only about one third of the amount it was hoped it would. This can hardly be surprising. Taxing incomes that have vanished is similar to chasing a street car. The incomes continued to vanish in 1932, and the proceeds of the tax are likely to be still smaller this year.

The Alberta Legislature, at present in session, could with reason suspend the income tax until the times improve. The province is getting comparatively little out of it.

Women Are More Pious.

According to popular belief—and the returns on the 1931 census appears to bear this out—Women are more pious than men. Classification of the various religious affiliations of the Canadian people according to sex, localities and age groups has just been issued. Male persons who recorded themselves as having no religion, number 15,361, and females only 5710. Women also appear more prone to link themselves with a religious denomination.

There were 14,375 males who gave their religion under some non-denominational term as Christian or Protestant and only 1688 females.

The male population of Canada at the 1931 census was 5,374,541 and the female population 5,902,245.

Spring Time.

Already there are many signs of approaching Spring, although officially it is not due to arrive until March 21st.

Spring is the season of reincarnation, rejuvenation and radiant life. It is only to man that January 1 represents the birth of a new year, and the calendar year is an artificial structure. With plant life and that of the lower animals the coming of spring is once the birth of a new year and new life.

Humanity recognises and speaks of a new year as from January 1, but nevertheless observes it from the first breath of spring. After the departure of the drear and stifling winter and with the coming of refreshing and magnetic spring there is new life and new hope created in the breasts of men and women. Spring brings great plans and high resolves which only winter can demolish or deter.

It is not sufficient to say that the homing instinct is convenient in the Spring. It is natural, and not to be gainsaid by man or beast. Spring urges the bird to build its nest, the animal to burrow into its mother earth, and man to plan his home, but neither bird, beast nor man knows or asks why. Spring is the one and only irresistible force.

Quick Action.

A farmer's boy from Fern Creek visited Edmonton last week and complained to the police he had lost his money. "We'll leave no stone unturned, my son, to find your purse," said the sergeant. The next morning, as the country boy was walking on Jasper Ave. he saw a gang of street menders at work digging the pavements, and exclaimed "Holy Smoke! they have not lost much time."—

SHE WAS GETTING FATTER

Now Down To Normal

"I was putting on flesh very rapidly," writes a married woman, "and also suffering from constipation, and was very jittery. Three months ago, a friend advised me to take a teaspoonful of Kruschen Salts in hot water every morning. I have kept this up regularly ever since, although I have been down to my normal weight (126 lbs.) for several weeks. I never felt better in my life, and I intend to carry on with Kruschen always. Several of my friends have remarked how slim I was getting and how well I was looking. After my having told them how it was done, they are doing the same."—(Mrs.) D.H.

Overweight arises frequently because the system is loaded with unexpended waste, like a furnace choked with ashes and soot. Allowed to accumulate, this waste matter is turned into layers after layer of fat. The six salts in Kruschen assist the internal organs to throw off each day the wastage and poisons that encumber the system. Then, little by little, that ugly fat goes—slowly, yes—but surely. You feel wonderfully healthy, youthful and energetic—more so than ever before in your life!

FREE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. We will send you a great many special "GIANT" packages which make it easy for you to move from "fat" to "fit." Ask your druggist for the new "GIANT" 75c package. This consists of our regular 7c bottle together with a separate trial bottle—sufficient for about one week. Open the trial bottle first, put it to the test, and then, if you are entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still yours as new. "Take it back." Your druggist is authorized to return your 7c bottle immediately without question. You have tried Kruschen free, at our expense. What could be fairer? Write: Dr. J. C. News of Rosenthal.

Fastnacht was spent with great merry-making at the home of Mr J J Kulak on Tuesday last; some 80 people took part in this great yearly event.

Everything started to roll about 9 o'clock, with plenty of Schwartzenagen, Bratwurst, and Frikuchel.

And then in the wee hours of the morning a great moaning and yammering arose — something had undoubtedly gone wrong; everybody knew it would happen; it had been haunting them all night, like a wraith. Then someone told them that, in spite of petting, coaxing and threatening, the pump absolutely refused to give out any more "New Edmonton."

And friends wended their way homeward as dawn crept

up over the eastern horizon. Thus sweet memories of Fastnacht must linger for another year.

Mr Geo Kulak is seriously thinking of buying another stallion, to replace the Percheron stallion which died last October.

Due to the severe weather and blocked roads, the R.A.C. considered it advisable to postpone the whist drive until Friday March 17.—R.N.R.

Holborn Happenings.

→The Junior Local held its economic meeting on Feb. 25, with a large attendance. Quite a large bit of business was carried out.

It was decided to gather together on Thursday for our model parliament, with W M Washburn as instructor.

Our session will open in the near future.

Rev and Mrs W E Sieber, and Mr Lawrence Sieber of Edmonton, were honored visitors. Rev Sieber gave us a very interesting address on economics, dealing with the two essentials—consumption and distribution.

Once again, to end up our meeting and make us forget our worries, the editor came forward with the greatest edition ever brought forth, and containing news but a few hours old.—H.J.R

Brightbank News

Mrs D McDonald is visiting with her sisters, Misses Ada and Jennie Lent, Edmonton.

Mr John Kyle was a Sunday visitor at the home of Mr D McDonald.

Miss Lena McKay, who has been with the Hudson's Bay Co. during the winter, is visiting with relatives in this district.

The U. F. A. are holding a whist drive and dance at the Lucknow Schoolhouse, Friday March 24.

Miss Palton and Mr Max Bowser were Sunday visitors with Mr and Mrs K Barnes. Everybody in the district seems quite contented since Election day. That is one good thing it has done; and all hope the contentment lasts twelve months.

Some Obsolete Equipment.

When the Arctic sends its annual snappy greeting, many Canadian motorists begin to use equipment that the factory never supplies. Auto robes make their appearance and, occasionally, a piece of cardboard to tuck in front of the radiator. Latest evolution tends to make both the robe and cardboard superfluous. Oldsmobile engineers point out, for instance, that even fleece lined hood covers and radiator shutters can be eliminated. The 1933 Oldsmobiles have an automatic system which keeps the water circulating thru the engine and away from the radiator until an efficient temperature has been reached. As for auto robes, they have been rendered unnecessary to some extent by insulating the cars at every point where drafts might enter, either with rubber and felt or with celotex interlining. Also, the doors have overlapping edges. Weather-proof windows and windshields, together with Fisher no draft ventilation, combine to make uncomfortable and dangerous drafts a thing of the past.

Card of Thanks.

I wish to take this opportunity of thanking my friends in Division Five for their renewed confidence in me by re-electing me as their Councillor at the recent Election.

Sale at Spruce Grove.

Having sold his farm south of the Grove last year, when he moved to the Grove, and being unable to get a suitable farm for the coming season, Mr Hy Ulmer has decided to hold a clearance sale of all his stock, farm implements, etc. The machinery and animals are being moved up to the Grove, where the sale will be held at the Livery Barn tomorrow, Friday, March 10. Clyde Smith will be the auctioneer.

Spruce Grove News

The big Liberal meeting at Stony Plain on Saturday drew a number of those interested in political affairs from here; among these being Messrs W E Brinstow and D Brox.

Spruce Grove Councillors will hold their first meeting on Monday March 13th, when the new Councillor, Mr Andrew Jespersen, will take his seat at the Council board.

The Grove's curlers have been fairly successful at the mixed bonspiel just finished at the Stony rink—Mrs Elder is said to have won a set of China sandwich plates, and Mr Connolly skipped the rink who got in on the Keystone curling brooms. Mr Connolly had donated 4 sacks of flour in another contest, at this bonspiel.

The snow plow from Edmonton made a trip along the Highway on Monday, opening up the trail.

Fertilizers Are Real Plant Foods.

Commercial fertilizers such as are produced at the Trail, B. C. are not a stimulant to pep up the soil, as some imagine, but provide real plant foods and at a cost that makes their use profitable, even at present low prices of wheat, said Dr T H Mather in addressing a gathering of 40 representatives of implement and land companies at the Macdonald Hotel, Edmonton, last week.

Pictures of crops grown with and without the use of fertilizers were screened. By reason of the fact that four or more of the implement companies are manufacturing seeder drill attachments for farmers desiring to adapt their present drills for the distribution of phosphates and other fertilizers with seed, these business men were interested to learn of the advance in its use.

Mr J H McLaughlin, local agent for Elephant Brand Fertilizer, made at Trail, B.C., was present at the meeting.
